

SURVIVOR 21™

DOCUMENT SECURITY YOU CAN BANK ON

MARKETPLACE CHALLENGE

New Government banking regulations and high-speed electronic archival check scanners require a proven technological breakthrough to answer the new security challenges. One of those challenges is creating documents that are archive-scan friendly, without compromising their security.

AUTHENTIGUARD SOLUTION

AuthentiGuard Survivor 21 protects printed checks from duplication via digital copiers and scanners while providing a security feature that survives the background dropout that result from your bank's archival scan.

HOW SURVIVOR 21 WORKS

1 Checks are embedded with hidden warning words as well as a secret verification symbol. These security features are all but invisible to the naked eye.

2 When copied or scanned, the hidden messages appear on the duplicate crisp, clear and unmistakable.

3 The secret verification symbol survives the background dropout of your bank's archival scan.

HIGHLIGHTS

- Anti-copy Anti-scan technology with easy verification.
- Check 21 compliant.
- Hidden warnings embedded on original blank checks.
- Pantograph 4000 protection exposes scanned or copied checks.
- Survivor 21 covert security features survives archival scanning systems.
- Can be implemented without any new equipment purchases.
- The embedded images are not visible when viewed normally so it does not interfere with check design.

VERIFICATION METHODS

- The Authenticator is a proprietary lens that reveals Survivor 21 hidden messages, images or logos for immediate authentication.
- Verifier logo and hidden messages, images or other text are revealed on copies or scans.

PRINTING REQUIREMENTS

- Works for all check products.
- Requires no new equipment.
- Compatible with most industry software.

ENSURE LIFE-CYCLE SECURITY FOR ALL CHECKS

AuthentiGuard® Survivor 21™ provides dual layers of anti-counterfeiting technology specifically designed to restore real security to checking transactions. The first layer uses the AuthentiGuard's groundbreaking Pantograph 4000™, embedding hidden warning words in the check that become visible when the check is scanned or copied. Survivor 21 then adds a secret verification symbol that survives the background dropout of the archival process and is recorded on the high-speed scan. Both of these security features are invisible under normal viewing conditions but appear – crisp and undisputable – on copies of the check and on the archival scan.

Adding AuthentiGuard Survivor 21 protection to forms printing operations requires no new printing equipment. Survivor 21 license holders can use industry standard software to implement AuthentiGuard Survivor 21 features.
